PROFILE

Systems-focused software developer building game architecture, developer tooling, and automation software. Passionate about open-source software, resilient systems, and reducing developer friction through thoughtful engineering.

EXPERIENCE

Founder & Technical Director • The Onliest Studios

July 2025 – Present

- Lead technical direction and development of *Vanguard & Flank*, a 2D grid-based tactical RPG targeting Steam Early Access in late 2026.
 - Design a custom ECS framework in Godot using data-oriented composition to improve scalability and eliminate deep inheritance bottlenecks.
 - Define engine architecture, game systems, tooling, and production pipeline as sole technical lead.
-

PROJECTS

BacMac6T • Disaster Recovery Systems Appliance

March 2026

- Built a high-density, automated backup appliance by integrating a 4TB HDD, two 1TB SSDs, and an industrial USB 3.0 hub into a space-constrained vintage Mac Mini chassis.
 - Designed a headless Debian environment utilizing Btrfs immutable snapshots and BorgBackup deduplication over an encrypted zero-trust mesh network powered by Tailscale.
 - Installed a custom active cooling system designed to maintain safe operating temperatures in a densely packed multi-drive enclosure.
-

OPEN-SOURCE

PowerCat • Precise PowerShell Utility • <https://github.com/TheOnliestMattastic/PowerCat>

October 2025

- Developed an open-source PowerShell module published in the PowerShell Gallery that consolidates project source into AI-ready context with token estimation, customizable filtering, and Markdown-aware formatting.
- Designed a Unix-inspired command-line interface emphasizing composability, deterministic output, and automation workflows.

HyperFix.nvim • Curated Neovim Distribution • <https://github.com/TheOnliestMattastic/HyperFix.nvim>

November 2025

- Developed and maintained Neovim distribution emphasizing discoverability, low-friction workflows, and mnemonic keybinding design.
 - Unified editor, terminal, AI tooling, and development workflows into a cohesive Linux-first environment using Lua and modern Neovim plugins.
-

TECHNICAL STACK

- **Languages & Frameworks:** C++, GDScript, JavaScript, Node.js, Lua, Bash, PowerShell
 - **Game Development:** Godot 4, Unreal Engine 5, Blender, Love2D, Material Maker, Inkscape
 - **Infrastructure:** Linux, Windows, Docker, GitHub Actions, Podman, BorgBackup, Tailscale
 - **Tools:** Git, Neovim, WezTerm, Obsidian
-

EDUCATION & CERTIFICATES

A+ • CompTIA

- Valid through September 2028

B.A. in Creative Writing & Psychology • City College of New York

- Summa Cum Laude, 4.0 GPA
